Getting Started with MIT App Inventor

App Inventor is a cloud-based tool, which means you can create apps for phones or tablets right in your web browser. This website offers all the support you'll need to build apps:

1. **Setup Instructions for Testing**: Set up your Android phone, iPhone, or tablet for live testing. (Or, start the emulator if you don't have a mobile device).

2. **Designer and Blocks Editor Overview**: Tour the App Inventor environment.

3. **Beginner Tutorials**: Jump in and get started programming in App Inventor.

4. **Packaging and Sharing Apps**: Package your app (Android only, for now!) and share it with friends.
